

ascellos™

MASK THE AGE OF YOUR SKIN

Ascellos™ is a Cosmetic Topical Product that is in full compliance with US FDA cosmetic regulations designed to maximize the cell-signaling capabilities of exosomes, delivering the regenerative effects of amniotic fluid and Wharton's Jelly delivered by the *FDA-cleared NanoPen®. A topical cosmetic with unadulterated Exosomes derived from pure amniotic fluid suspension and umbilical cord Wharton's Jelly.

Averaging 350 Billion protein particles carrying varying exosome cargo of miRNA, mRNA, proteins, lipids, growth factors, peptides, Extracellular Matrix, collagens, and Hyaluronic acid.

Aesthetic applications that have shown success, especially when combined with other modalities as a balanced attack, improve outcomes:

- Facial aesthetics
- Acne treatment
- Hair improvement
- Scar revision
- Collagen stimulation
- Epidermis hydration and nourishment

Comprehensive Ingredient Profile

- Wharton's Jelly derived Exosomes
- Over 200 growth factors
- More than 35 Amino Acids
- 150 Proteins
- Collagen Types I, II & V
- Urea

Discover how this safe, non-surgical treatment can transform your patient's skin. Ascellos™ is available in a frozen flowable format and now has an increased potency 5mL Lyophilized version to simplify shipping and storage.
